

Dead Crow Density*

*(Dead crow sightings per square mile)

Week of November 17 - 23, 2002

Density increased since last week by 0.2 or more Density decreased since last week by 0.2 or more

Low density (< 0.1)(0.1 - 1.5)**Medium density**

High density

Note: Dead crow sightings are a possible early warning of, but not definitive confirmation of, West Nile virus activity.

Crows die of many causes and reporting levels may vary among counties.

Numerical cutoff points between risk levels reflect past experience and may change as new data become available.
